High Risk Work Activities

By law, you must determine and safely manage your high-risk construction work in accordance with WHS Regulations 2022 Part 6.1. The regulations define what high-risk construction work is understood to mean, as listed in the table below. Please tick the high risk construction work activities that your company currently undertakes to help determine when you will be required to implement SWMS.

<input type="checkbox"/> involves a risk of a person falling more than two metres	<input type="checkbox"/> is carried out on or near energised electrical installations or services
<input type="checkbox"/> is carried out on a telecommunications tower	<input type="checkbox"/> is carried out in an area that may have been contaminated or flammable atmosphere
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing or otherwise related to the physical integrity of the structure	<input type="checkbox"/> involves tilt-up or precast concrete, or
<input type="checkbox"/> involves, or is likely to involve, the disturbance of asbestos	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor that is use by traffic other than pedestrians
